TECHNICAL SKILLS

Proficient: React.js - JavaScript (ES6) - Node.js - Express - HTML5 - CSS3 - Bootstrap4 - Fetch - RESTful APIs - jQuery

Experienced: Redux - Python - Django - Flask - C# - PHP - Koa - MySQL - PostgreSQL - MongoDB - mongoose - Sequelize - passport.js - bcrypt - crypto - Joi - Styled Component - Sass - Jest/Mocha/Chai - React-testing-library/Enzyme

Tools: Git, GitHub - Postman - npm - Chrome Dev Tools - VS Code - JSON - Webpack - Babel - CLI - Ubuntu - Docker - AWS

APPLICATIONS DEVELOPED

Student-Grade-Table | **Live**  | **GitHub**  React.js-React Router-Context API-Node.js-Express-MySQL-Sequelize-JWT-Crypto
- Built application using **React.js**, **Context API** to create, read, update, and delete for student's grade management
- Generated user **SignUp** & **SignIn** using **JWT** and **Crypto** to protect user's password and store it in database. without **SignedIn status(used local storage)** to restrict adding or modifying data
- Created **Node.js** server using **Express** framework and installed **Sequelize(Object-Relational Mapping)** to connect with **MySQL** databases to implement grade & user table

Patagogogo | **Live**  | **GitHub**  React.js-Node.js-Express-PostgreSQL-Bootstrap4-Express-sessions
- A **mobile-responsive(using Bootstrap4)** Full Stack **Content Management system** that allows users to add to cart, remove from cart, check out, and confirm their orders with a user-friendly interface for e-commerce
- Created accessible data across pages using **Express sessions** and storing client **cookies** to create unique carts

Flash-Card | **Live**  | **GitHub**  React.js-Bootstrap4-window's local storage
- Built using React.js to implement CRUD app for people who want to study or memorize concepts
- Generated using **browser's local storage** to store data what user want to have on the flash card
- Executed **responsive** and intuitive front end component design using **React.js** and **Bootstrap 4**

Burgers-N-Brew | **Live**  | **GitHub**  React.js-React Router-Express-Passport.js-bcrypt-PostgreSQL-Sass
- A **full stack mobile-responsive CRUD app**, designed for hungry people who find deals on a classic combo which built in 2 weeks in a **team** of three and **under remote working conditions**
- Dynamically renders content to the DOM using **React.js** based on user's current location or city name using **Google API**
- Generated user signup and login using **Passport.js** and **bcrypt** to protect user's password and store it in **PostgreSQL** database
- Tracked progress using **MeisterTask** and **Slack** under **AGILE** methodology while conducting daily stand ups
